Results kept: 14 | Dropped as too old: 0 | Dropped as duplicates: 2

Dropped as truncated URL: 1 | Dropped as profile page: 3

LIVE via Tavily Playground, Nov 5, 2026. This briefing is built from 20 Tavily Search results (topic news, basic depth, last 30 days) gathered in the Tavily API Playground while signed in as pakmultilinks@gmail.com. The Playground JSON view truncates long snippets at about 100 characters, so each snippet below is the truncated extract exactly as returned, never a fuller text. Results whose source URL was truncated in the Playground display were dropped because the link cannot be verified, and Tavily knowledge-company profile pages were dropped because they are profiles, not dated developments. Every development kept here carries its complete source URL and its published date, or 'date unknown' if none was shown.
